Full Stack Engineer | React Native Developer

Professional Summary

Full Stack Engineer with nearly 3 years of experience shipping production mobile and web platforms. Strong in React Native CLI/Expo, TypeScript, Next.js, NestJS, Hasura GraphQL, Firebase, PostgreSQL/PostGIS, and AWS. Owns work from architecture and feature delivery through cloud setup, app-store release, SEO, analytics, and production debugging. Built and published Mistify across iOS/Android and currently works on Offroad Rental Hub for Dejavu Adventures in Dubai.

Technical Skills

- **Mobile**: React Native CLI & Expo, TypeScript, React Navigation, native modules, Swift, Kotlin, camera/media, maps, push notifications.
- **Web**: React.js, Next.js App Router, Tailwind CSS, responsive UI, SEO landing pages.
- **Backend & APIs**: NestJS, GraphQL/Apollo, Hasura, REST APIs, Firebase Admin, Cloud Functions, Stripe, Resend.
- **Data**: PostgreSQL, PostGIS, Firestore, Supabase, MySQL.
- **Cloud & DevOps**: AWS IAM, S3, CloudFront, RDS PostgreSQL, Firebase Hosting/App Hosting/Auth/Storage/FCM/App Check/Analytics, Docker, GitHub Actions, CI/CD.
- **Store Release**: App Store Connect, TestFlight, Google Play Console, signing/certificates, listing optimization, app transfer support, Fastlane.
- **State & tooling**: Zustand, Redux, Apollo Client, Git, Xcode, Android Studio, Postman.

Professional Experience

Thunderbird Technologies—Full Stack Engineer, Oct 2023–Present

- Lead full-stack development for Mistify, a production iOS/Android location-based social app using React Native, TypeScript, NestJS, Hasura GraphQL, PostgreSQL/PostGIS, Firebase, and AWS.
- Built custom camera/media flows with native iOS/Android work, image/video compression, thumbnails, caching, WebP conversion, and S3 upload delivery using pre-signed URLs.
- Implemented Firebase authentication with phone OTP, Google and Apple sign-in, NestJS token exchange, Hasura JWT claims, and row-level authorization.
- Delivered proximity-based discovery with Mapbox, geospatial PostGIS queries, location privacy, stories/posts, follows, reactions, comments, reports, and notification workflows.
- Built Firestore chat with presence, delivered/seen status, offline retry/outbox, anonymous chat mode, block-state handling, and FCM push routing.
- Managed production releases for Google Play and the App Store, including build variants, app signing, store listings, CI/CD, deployment troubleshooting, and app transfer/support workflows.

- Built a Next.js admin/moderation dashboard with React, Tailwind, shadcn/ui, Apollo/Hasura, Firebase auth/session handling, reports, user management, and Firebase App Hosting deployment.

Dejavu Adventures—Full Stack Web Developer, Jun 2026–Present

- Develop and manage Offroad Rental Hub, a Dubai off-road rental and desert adventure booking platform built with Next.js 14, React, Tailwind, Zustand, Firebase, Stripe, and Cloud Functions.
- Implemented localized commercial landing pages for dune buggy, quad bike, dirt bike, and desert safari searches with canonical URLs, alternate locale paths, sitemap coverage, Open Graph metadata.
- Built booking, payment, refund, email, and revalidation flows using Firestore, Firebase Storage, Firebase Cloud Functions, Stripe, and Resend.
- Developed admin tools for vehicles, image uploads, bookings, customers, blogs, analytics, tracking settings, CSV export, and content updates.
- Added analytics/conversion tracking for product views, checkout steps, purchases, WhatsApp clicks, and booking funnel events.
- Own cloud/project configuration across Firebase environments, security rules, storage paths, function regions, environment variables, and production deploy checks.

Key Projects

Mistify—Social Media App

- Built a full-scale social platform with React Native, TypeScript, NestJS, Hasura, PostgreSQL/PostGIS, Firebase, AWS, Mapbox, and Firestore chat.
- Live (Android): https://play.google.com/store/apps/details?id=com.mistify
- Live (iOS): https://apps.apple.com/au/app/mistify/id6744645517

Offroad Rental Hub—Dubai Rental Booking Platform

- Built customer website and admin platform for Dejavu Adventures with Next.js, Firebase, Stripe, SEO localization, analytics, and image/content management.
- Live Website: https://offroadrentalhub.com/

Rydoo – React Native Cab Service App

- Developed a cross-platform ride-booking app with Firebase and real-time location tracking.

Pulse Music—Music Player Built in React Native

- Built music player with playback controls, playlists, background playback, and media-focused UI. GitHub: github.com/hashhirr/react_native_music_Player

Crossroad/Firechat—Realtime Chat Apps

- Built Firebase/Supabase chat prototypes with authentication, real-time messaging, presence, and push notifications. GitHub: github.com/hashhirr/crossroad_chat_app
